

We help villages, districts, and other public agencies meet the ADA Title II accessibility rule, and we build and host the sites and tools they run on. You work directly with the person doing the work.

What we do for agencies

Accessibility audits. Your pages and posted documents tested against WCAG 2.1 AA, with a plain-English list of what to fix first.

Fixes and rebuilds. We fix the site you have, or move you to one that passes when that's faster.

Document remediation. Agendas, minutes, forms, and reports made readable by screen readers, and a way to post new ones right.

Hosting and monitoring. Hosting, backups, uptime checks, and an accessibility check every month and after every update.

Software and private AI. Portals and internal tools, and private AI that keeps your files off public AI services.

Why us

- You work directly with the person doing the work, from the audit to the fix.
- We test to WCAG 2.2 AA, which covers everything 2.1 AA asks for.
- Sites, documents, hosting, and monitoring from one vendor.

How to buy from us

- A written quote and a purchase order, for work under your purchasing threshold
- A subcontract with your prime contractor
- A fixed-scope project, or a monthly plan for hosting and monitoring
